

GANPAT BHADKE

Artist Statement

INVOLUTION The human being is a miniature universe. All that is found in the cosmos can be found within ourselves. To describe ascension towards the spiritual realm. The individual being and universal being are the ones. All that exists in the universe also exists within us. During the process, consciousness expands from concrete reality to abstract truth. The union of individual consciousness with cosmic consciousness is identical to Ultimate Reality and is the origin of all phenomena. Tat tvam Asi
