

MS AMARNATH

Artist Statement

I have been painting for over 35 years, exploring various mediums, with a strong inclination toward Abstraction. This genre offers me immense freedom and joy, allowing for spontaneous expression and poetic visual language.

My artistic practice is rooted in a postmodern sensibility, drawing inspiration from my immediate environment. I seek to distill visual language from the cultural and social life that surrounds me, allowing these influences to shape my forms and ideas organically.

Color and form emerge intuitively in my work, often evolving in the process, as I strive to create a delicate balance between form, color, and space. Innovation and experimentation are at the core of my practice—I am constantly exploring new combinations, textures, and imagery.

Creating art, for me, is a deeply contemplative process. I engage intensely with the subtleties of color and the emotional resonance it brings to a composition. Each work is a continuous journey of refinement and discovery, driven by a desire to arrive at something honest, layered, and evocative.
