

PARESH HAZRA

Artist Statement

I am Paresh Hazra an artist from Bangalore. After my Art collage last forty five years I am still working and exhibiting my work India and abroad.

I am working on old egg Tempara medium is a unique technique and style. My work is my signature, my expression of self realisation, where traditional yet contemporary ideas and values mix together.

My technique is complicated technique of old egg Tempara , which is also one of the oldest mediums of western art. It is a very unique practice, incorporating conventional as well as contemporary theme and motifs.

My opinion is art is surreal, it takes from when imagination and fantasy mix together. There is no greater joy in reality than in imagination. My paintings are not just for the sake of art, they are more of my expression of self realisation, which is the process may give joy to others.
