

VIVEK NIMBOLKAR

Artist Statement

All artistic creation is a form of imitation.

My paintings are the only medium to express my experience and affection towards spirits of nature. It gives me the feeling of become one with the vast universe we live in. These stylized abstract forms have a definite structure and drawing. All the paintings complement each other and viewing them together is like taking a journey around the nature

Art evolving from my huge images resources of nature, lead to a vast pictorial vocabulary, free from limitation highlighting sceneries of my selected moments or forms. Untitled painting entangles the decorative and the expressive element—interplay of forms and textures with colours in a constructed pictorial parameter. I used different mediums to express my feelings on canvas with vibrant colours and forms.

My paintings are the glimpses of nature life on the canvas. Imagination and minimalistic approach with colours, textures and space lends my paintings a mesmerizing visual vocabulary which took the viewer into a peaceful space. All these paintings find their own existence and space in viewer's perspective. All the paintings are communicating with viewers through the intellectual composition of lines, space, texture, colours and forms such as triangles, circles, half circles and rectangles.
